28 years old, Single | Person with Disability (PWD): H90.3 – Bilateral Sensorineural Hearing Loss

PROFESSIONAL SUMMARY

Mid-level QA / Software Test Analyst with over 6 years of experience in Functional, Regression, Exploratory, Web and Mobile Frontend, and API testing (Postman/Swagger). Strong hands-on experience in test automation with Cypress and CI/CD integration testing (Jenkins), working with Agile methodologies (Scrum and Kanban) and Agile ceremonies (Planning, Refinement, Daily Stand-ups). Experienced in interpreting database and application logs (Oracle, PostgreSQL, MySQL, SQL Server, MongoDB) to support root cause analysis of defects, designing test cases and scenarios (Gherkin), and defect tracking using Jira and Azure DevOps. Worked on projects in E-commerce, Retail, Financial/Banking Systems, and the Public Sector, with an interest in expanding into Playwright.

SKILLS & COMPETENCIES

Methodologies & Processes: Agile methodologies (Scrum, Kanban), Agile ceremonies (Planning, Refinement, Daily Stand-ups), test complexity estimation, basic root cause analysis.

Testing: Functional, Exploratory, Regression, Web Frontend, API (Postman/Swagger), Automated (Cypress), test case and scenario design (Gherkin), CI/CD integration, manual, and mobile testing.

Databases: PostgreSQL, MySQL, Oracle, SQL Server, MongoDB, DBeaver, database and application log interpretation.

Tools: Jira, Azure DevOps, Git, Redmine, Confluence, Postman, Swagger, Figma, Jenkins, Cursor, UTF-Mobile, Octane, Android Studio, Tomcat/XAMPP, LDAP, MobaXterm, FileZilla, Lens, Artificial Intelligence (AI applied to testing).

Programming Languages: PHP, Java, JavaScript.

Related Technical Terms: Quality Assurance, QA Engineer, Test Analyst, Manual and Automated Testing, API Testing, Regression Testing, Agile Testing, CI/CD Pipeline, Bug Tracking, Root Cause Analysis.

PROFESSIONAL EXPERIENCE

STEFANINI GROUP

Mid-Level Quality Analyst (QA) | **Oct 2024 – Apr 2026**

Project: Ri Happy – E-commerce and Retail Chain

Technologies: Jira, Miro, Qality, Postman, DBeaver/MongoDB, Lens, AWS, Wiki, Bitbucket, AI (SAI), Podman, OpenSearch, Cursor, Cypress

- Analyzed user stories and defined test and development complexity estimates.
- Performed functional and frontend testing of web applications (desktop and mobile), covering critical e-commerce and retail features.
- Conducted API testing using Postman and OpenSearch, validating REST endpoints.
- Analyzed system screens and validated UI/UX using Figma.
- Defined test types, developed Gherkin test scenarios, and tracked defects with AI assistance.
- Developed automated tests using Cypress and Cursor, including integration testing in CI/CD pipelines.
- Actively participated in Agile ceremonies (Refinement and Planning) under Scrum/Kanban, collaborating continuously with Development and QA teams.

STEFANINI GROUP

Mid-Level Quality Analyst (QA) | **Project – FAPESP**

Project: São Paulo Research Foundation

Technologies: AWS, Lens, DBeaver, GitHub, AI (SAI), Figma, Swagger, Postman, Azure DevOps, Eclipse

- Analyzed user stories and estimated the complexity of functional tests.
- Tested a web system and defined applicable test types (Functional, Regression, Exploratory).
- Developed Gherkin test scenarios and tracked defects with AI assistance.
- Interpreted database logs using DBeaver to support root cause analysis and identify defects between backend and frontend.
- Planned weekly activities with the QA team and participated in Planning and Refinement meetings.
- Analyzed system screens using Figma.

BETHA SISTEMAS

Development Assistant | **Oct 2023 – Apr 2024**

Project: Education Vertical – Education System

Technologies: Jira, Confluence, GitLab

- Analyzed and developed test cases and scenarios.
- Reported defects and followed up on fixes with developers.
- Estimated testing effort based on time and workload.
- Performed manual and functional testing of web systems.
- Created and executed performance tests.
- Participated in Grooming meetings to plan activities and test scripts.

MATERA SYSTEMS

QA / Test Analyst | **Jul 2022 – Jun 2023**

Project: Open (Fixed Income) System, Tech Bank Investimentos

Technologies: Jira, Confluence, Tomcat, Jenkins, Open Market, PL/SQL Developer, Postman, Stach

- Participated in estimation, DevBox, and test planning meetings.
- Wrote test cases, cycles, and plans, and generated execution reports using Zephyr.
- Performed manual, regression, and API testing (REST/Oracle).
- Interpreted application and Oracle database logs to support basic root cause analysis of failures.
- Prepared test environments (Tomcat) and Oracle databases, including beta version generation.
- Closed and released versions through Jenkins CI/CD pipelines.

CI&T; SOFTWARE

Software QA Tester | **Mar 2021 – Jul 2022**

Project: Financial-sector client – Android mobile testing for banking transactions (bill payments through an authorization system) and interface testing

Technologies: Jira, Confluence, UTF-Mobile, OCT-Alm. Octane, Extra CICS, Internet Banking, Android Studio, Bitbucket, Firebase

- Performed testing in a staging environment and prepared test artifacts and evidence.
- Executed functional, exploratory, regression, and automated tests.
- Planned mobile test cases and scenarios using OCT-Alm. Octane.
- Reported and tracked test evidence and bugs in OCT-Alm. Octane.

LIFE TECNOLOGIA E CONSULTORIA

Systems Tester | **Jun 2020 – Oct 2020**

Project: SMEG (Management Excellence Model System), SGC (Career Management System), and SPU (Federal Government Assets System)

Technologies: Redmine, GitLab, Rancher

- Performed manual and functional testing and prepared test plans and execution evidence.
- Planned execution across three test cycles.
- Performed acceptance, compatibility, regression, functional, and non-functional testing (exploratory, connectivity, security, stress, and load).

FÓTON INFORMÁTICA

Tester | **Jul 2019 – Apr 2020**

Project: SISAG – Banking Products and Services Automation System at Caixa Econômica Federal branches (bill payments, transfers, and deposits)

Technologies: Jira, LDAP, MobaXterm, FileZilla, Sirot, Linux, Confluence, TestLink, Jenkins, SQL

- Performed functional and exploratory testing and confirmed incidents in a Linux environment.
- Executed SQL scripts and prepared test evidence artifacts.
- Created use-case-based test case documents and reported evidence in Jira.
- Planned execution across three test cycles.
- Performed acceptance, compatibility, regression, functional, and non-functional testing (exploratory, connectivity, security, stress, and load).

EDUCATION

Postgraduate Certificate (Lato Sensu) – Software Engineering with an Emphasis on Quality and Testing — Faculdade Vincit | Completed: Feb 2026

Associate Degree in Systems Analysis and Development — UDF – University Center of the Federal District | Completed: Dec 2023

COURSES & CERTIFICATIONS

- Test Automation with Selenium – Sep 2024 (Universidade QA/GreenClub)
- Cloud Fundamentals, Administration and Solution Architect – Apr 2024 (FIAP)
- Java Fundamentals – Oct 2023 (FIAP)
- Building Dynamic Web Pages with PHP – Sep 2023 (Udemy)
- Complete Test Automation Course for Beginners – Aug 2023 (Udemy)
- TDD and Java: Automated Testing with JUnit – Oct 2021 (Alura)
- Git and GitHub: Code Control and Sharing – Sep 2021 (Alura)
- Git and GitHub: Strategy and Branching, Conflicts, and Pull Requests – Sep 2021 (Alura)
- Automated Testing: TDD with Python – Sep 2021 (Alura)
- Integration Testing: Automated SQL and DAO Testing in Java – Sep 2021 (Alura)
- Scrum Foundation Professional Certificate (SFPC) – Jun 2020
- MySQL Database – Mar 2020 (Udemy)
- Linux Terminal – Mar 2020 (Udemy)
